

Speech Memorization

Authors: Reagan Gooch, Lexi Duncan, Caleb Corpening, and Seth Bickford

Problem Statement

Our users are struggling to memorize information anywhere from speeches to scripts, and they feel there is no good way to do so. Our solution should provide users with an easy and efficient way to memorize the information they need.

Who is experiencing the problem?

Individuals who need to memorize a chunk of information (speeches, facts, scripts, etc.).

What is the problem?

Memorizing any amount of information can be difficult and time consuming.

Where does the problem present itself?

Typically in classes, theatrics, or presentations.

Why does it matter?

People need an easier, more efficient way to remember information, so they can perform/recite it to the best of their ability.
